

Replacement Webbing for Corbusier Seating

Item No.: WEBBING

Webbing Sizes for Corbusier Seating:

Designer: [le Corbusier](#)

Product Group: [replacement parts](#)

Product Group: [replacement parts](#)

DESCRIPTION

Nothing lasts forever, and that includes the nylon webbing used in the le Corbusier seating collection. Whether you have an original Cassina brand of the LC2 or LC3, or one of our versions, or maybe you got an off brand, the nylon webbing under the seat cushion seem to wear out over the years, depending on how much the chairs or sofas are used.

So we are now offering a set of replacement webbing straps for each of the le Corbusier models. Included in each kit are the requisite number of webbing straps with a stainless steel hook at the end of each strap. Replacing the webbing is simple, just remove the old straps and hook in the new ones.

Item Number	Depth (in)	Count	Width (in)	Count
Webbing-W2001	19	5	19	8
Webbing-W2002	19	8	35	8
